ELECTRON THEORY. (Radio Electronics.
Reel lesson 7) De Forest's Training,
Inc., 1948. 100 feet, b&w, 16mm.

Summary: Explains that all substances
are composed of infinitely small atoms
resembling our solar system, the central
body being the positive nucleus and the
outer revolving bodies being the negative
electrons. Shows that when the atoms
become negatively and positively charged
a condition of unbalance exists, and the
resulting flow of electrons, which tend

to restore a balance, can produce usable energy.
